

Learning Design Consultation

Uncover your message.

GRACE

Offering and cost

OVERVIEW

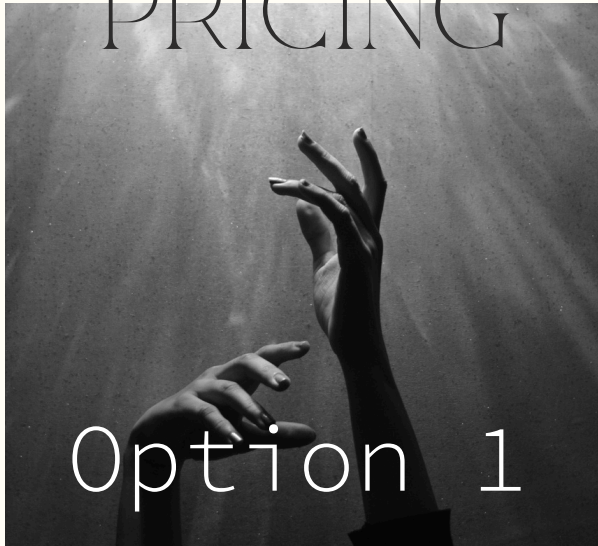

Every soul has a unique concept, way of being or understanding to bring to the world. Join me on a journey of uncovering and developing your soul-designed offering. This is a space for the creatives, the healers, the nourishing movers. A space for you to delve inside and emerge with an offering for humanity. Together we explore the concept of you as teacher, we dive into your student profile and we create a lovingly, considered curriculum outline. Whether you want to run retreats, courses, workshops, programs, monthly masterminds or more, this is for you.

OUTLINE

	EDUCATION SPEAK	Learn a few basic educational theory concepts, a brief orientation to introduce you to a few words and ideas in the space.
	YOU AS TEACHER	Explore your identity as teacher, identify and neutralise resistance to the concept of teacher. Together we will create your teacher persona and strategy.
	STUDENT PROFILE	How are your students turning up? What are they thinking and feeling? What do they need. Together we will create your student profile.
	CURRICULUM	What are you here to teach? Together we will uncover your unique message and create a program outline for you to deliver.
	ONGOING	After our session I will create a profile and editable outline for your program. You will then flesh out the detail with 3 additional weekly 1:1 sessions to sift through any difficulties you may be having.

Together we will determine your teacher and student profile, determine what and how you will be delivering your teaching and create an outline for you to build over subsequent weeks. You will have voice-note access to me throughout our time together for support and ideas; as well as 3 additional 1:1 sessions where we can work through the creation process of your full program.
